

Transportation Committee
September 2016

Brian Longley, Pat Thompson, Scott Jensen, Betty Wheeler, Ray Brian, Les Everett

| | |
|-----------------------------|--|
| Introductions and Agenda | Started at 7:01 at moved to approve the agenda. John Mark seconded. They passed unanimously. |
| SAP Elementary Redesign | SPPS came to present on the renovations at SAP Elementary. We will reach out to the community to gather stakeholders to discuss this project. Les moved to support the work of SAP Elementary parents in securing a school zone designation on Como. Pat seconded. Betty offered an amendment to add Gordon and Raymond in the discussion. Les accepted that as a friendly amendment. The motion passed unanimously. |
| Raymond Ave. Reconstruction | Pat saved the plants from the median. The fall construction will go through Standish and then the project will pick back up in the spring. |
| Drive 25 Campaign | There seems to be little change on Raymond from the data we got, but the drop in how many people going over 30 on both Como and Raymond dropped. Both directions on Como dropped 3 miles an hour. The study consciously avoided the 280 reconstruction. |
| Drive 25 Resolution | Pat wrote a rough draft resolution that the Committee discussed. they discussed whether we should ask for a reduced speed limit overall or to ask for a specific number. They discussed format of the letter and who to send it to. Pat will take another stab at the letter and then pass it back through the group. It will be on next month's agenda after everyone responds to it over email. |
| Other Agenda Items | Hampden Park has a solar powered charging station and a bike fix it station. Drag racing continues to be a problem. We should talk about it next month. |
| Adjourn | adjourn at 8:16 |
