

St. Anthony Park Community Garden Dates and Rules 2025

Important Dates for 2025

Applications due from returning gardeners	February 01
Applications due from new gardeners	March 8
Zoom Spring Meeting	April 5
Plant-by date	June 8
Clean-Up Date	Sunday October 19

Garden Rules

Failure to abide by these rules, including failure to maintain one's plot, will result in forfeiture of an individual's plot and ineligibility for a plot in the succeeding year.

- Plots must be at least partially planted by **June 8, 2025**. Plots not planted will be reassigned.
- No stealing (harvesting from others' plots without authorization), or verbal or physical harassment is allowed. Violation of these rules will result in immediate expulsion from the garden.
- Gardeners should respect each other's plots. Leave a one foot wide unplanted border along each plot line where there is no aisle, 6 inches on each side of the line. Do not place opaque structures where they will shade a neighboring plot. Tall crops, such as sunflowers and corn, should be planted so as not to shade other gardener's plots.
- Gardeners provide their own tools and seeds. Water and hoses are available at the garden.
- Please help conserve water by not watering aisles and by watering no more quickly than the soil is capable of absorbing. Be considerate of other waiting gardeners. Water hoses must not cross other plots and must be attended at all times. Water sprinklers are not permitted in the garden.
- Rocks which are removed from one's plot should be piled in the designated area at the east end of the garden near the shed. Do not add rocks to the pile at the west end which is full. Rock borders are not permitted on the exterior borders of plots, including the outside flower beds, because they interfere with mowing. Do not dump rocks in the path.
- **Gardeners must maintain plots (including adjacent aisles) throughout the growing season.** This means;
 - Keeping annual weeds from going to seed and keeping perennial weeds, such as quackgrass, bindweed, and tree seedlings from becoming established. If left, these will be a problem for future gardeners and garden neighbors.
 - Keeping trash out of their plots. This includes empty plant pots and old trellising and fencing. There are no trash receptacles at the garden, so what is brought in should be taken out. An exception may be made for extended-season plot holders who wish to store trellising in the garden over the winter, as long as it is done neatly and is not abandoned.
- We encourage composting weeds within your plot. Weeds can be composted as mulch between rows of your plants or in a designated pile in your plot. Crop residue that is infested with insect or disease can be taken to the Ramsey County compost site on Pierce Butler. All other plant matter is best left in one's plot to return their nutrients to the soil.
- Herbicides are not permitted in the garden. Insecticides and fungicides are strongly discouraged. Consult <http://www.extension.umn.edu/gardeninfo/> for alternatives or ask a Master Gardener.
- If a gardener uses wood chips, they must remove them by cleanup day.
- Seasonal plots must be cleared at the end of the growing season prior to the fall cleanup date on **October 19, 2025**. All fencing, trellises, stakes, and synthetic mulch should be removed from seasonal plots and taken home for the winter. These materials interfere with plowing/tilling in preparation for the next season. Crop residues need not be removed unless they are harboring seeds, insect or disease pests.
- If a garden is abandoned during the year, or the gardener fails to clean up his or her garden in the fall, no plot renewal/request will be allowed for that gardener in the following year.
- Electric fence is not permitted in the garden.
- Children are welcome at the garden when accompanied by an adult. That adult is responsible for their behavior. Pets are not allowed in the gardens.

The Steering Committee has the responsibility and authority to monitor plots for compliance with policies and to raise concerns they may have with gardeners. Enforcement of policies may include taking a plot away from a

gardener and/or not allowing a gardener to return next year. If for any reason you are unable to maintain your garden, it is your responsibility to find someone to maintain it for you and contact the steering committee.

Call 651-271-9844 if you have any questions.

Policies

The St. Anthony Park Community Garden is a cooperative garden. All gardeners are expected to take an active role in tending their individual plots as well as maintaining the entire community site. In the spirit of cooperation, all gardeners shall treat the garden, other gardeners, neighbors, and visitors with respect and consideration.

Garden Management

The St. Anthony Park Community Garden is a self-organizing project of the St. Anthony Park Community Council (SAPCC), which owns the property and which has authority and responsibility for its use. SAPCC dedicates three plots for growing vegetables to be donated to a food shelf of the Steering Committee's choosing. The implementation is the responsibility of the Steering Committee. All monies are handled by the SAPCC through its 501c3 account. Fees for 2025 are \$40 per plot and cover operating expenses, office costs and assessments. Contributions to the Community Garden in excess of fees are used to build up reserves for capital improvements. Contributions are tax deductible. The SAP Community Garden steering committee will supervise all financial business.

Types of Plots

Seasonal plots, which are tilled every spring, approximate 15 x 20 feet and are closest to the street. Each individual plot is part of a larger section supervised by a section manager. The section managers and the garden coordinators form the garden steering committee. This team makes decisions related to garden policies and procedures, including enforcement of rules. The section manager is responsible for mediating complaints within each section. The Steering Committee is responsible for any issues beyond the scope of a single section. Any gardener wishing to serve on the Committee or to work on any project for the gardens should contact a member of the steering committee. Ideas are welcomed.

Extended-season plots, which are not tilled, are on the back row and at the west end. Extended-season plots must be kept up to the same maintenance standards as seasonal plots (see below for further clarification) and must be renewed each year. No trees are allowed. Weeds need to be kept down and not allowed to go to seed. Tree seedlings need to be kept out of the fencing. In addition, the plot renter is responsible for maintaining a path between their plot and the fencing between the gardens and the railroad as well as for keeping that fencing clear of vegetation. Extended-season gardeners who expect to return may leave structures in place over the winter, but if they do not expect to return they are expected to remove structures before they leave.

Flower beds are located along the south side of the fence on Robbins St. and are approximately 10 x 3 feet. They are available on a first-come, first-served basis. There is no fee for flower plots. These flower beds help make our garden an attractive presence in the larger community.

Plot Assignment Procedures

Returning gardeners will receive an application via mail by January 04. The deadline to return them, by email or postal mail is February 1st. A check or money order must also be received by February 1st. Mail the check or money order to Sue Conner 2265 Luther Place #302, St. Paul, Mn. 55108. This assures that returning gardeners will be granted the same plot, if that is their request, or a different plot, if one is available. If a returning gardener's application is received after February 01, the application is handled as a new gardener application. Application forms will be available to new gardeners from Feb 01 to March 1, either on the website www.sapcc.org or at the Hampden Park Co-op. Deadline for applications is March 8. Open plots will then be assigned to applicants by lottery. If requests cannot be filled, the fee is refunded.

Applicants will be notified by mail and by email if they have been assigned a plot

A waiting list is kept for current gardeners who wish to have an extended season plot instead of a seasonal plot. (Only one plot is assigned per household.) When a plot becomes available, it is offered to the person at the top of the list, if that gardener has met community standards and has the approval of their section manager. Contact the garden coordinators if you wish to be added to the list. A wait list will be maintained for if a plot becomes available.
